

BUB is a very special one-of-a-kind critter.

In July of 2011, **BUB was discovered as a feral kitten in Bloomington, IN.** She was taken in as a rescue **by "her dude"** when it was clear that she would require special care. Since then, BUB has become one of the most famous cats on the planet. She is a **twice published author**, a **talk show host**, the **star of an award winning documentary**, the **subject of groundbreaking genetic research**, a **Billboard chart-topping recording artist**, the **star of her own TV Special on Animal Planet**, and has appeared on **Good Morning America**, **TODAY**, and **The View**. In 2014, she founded Lil BUB's Big FUND for the ASPCA (the first national fund for special needs pets), and to date has **helped raise over \$400,000 for animals in need**. To learn more about BUB and read her truly fascinating story, please visit **www.lilbub.com/about**.
